¹ Only biomass defined as the biodegradable fraction of products, waste and residues from biological origin from agriculture, including vegetal and animal substances, from forestry and related industries, including fisheries and aquaculture, as well as the biodegradable fraction of waste, including industrial and municipal waste of biological origin (Directive (EU) 2018/2001).

² Please be aware, that animal fat is not considered biomass in some Member States. Biofuel produced from a feedstock of animal origin might thus not be eligible to be counted against the biofuel quota in those Member States.

³ Vegetable oil which has been used for cooking or frying meat and therefore may be contaminated with animal content does not classify as of animal origin.

⁴ Total amount of sustainable delivered waste/residual materials as an average of the last 12 month
